

1. What is the year of manufacture (look on the back of the unit, near the serial number)
2. What are the hardware specifications or the hardware platform? Pull off the back of the panel and look on the frame, half way down on the right hand side of the frame there will be two letters.
3. How many millings are on the milling unit?
4. What version of software is currently installed on the unit?
5. Is the service club still active, if not, when was it cancelled?
6. Do you have any accessories such as blocks, milling oil, burs, powdering device, powder, etc.? If so, how many of each?
7. Five photos: 1- Cerec acquisition unit. 2/3- Close-up of milling unit rotors with a bur in each side. 4- Close-up of the camera lens. 5- All accessories.
